And, I am only mentioning what the Centre is giving; that is, over Rs. 3,500 crores per year to the State Governments. This is the third year and over Rs. 10,000 crores have been given by this Government for this type of development. Then, as regards encroachments, while on the one side, we are doing development of roads in a massive, unprecedented manner, we have also to take into consideration the various problems that are arising; say, the problems pertaining to the development of four-lane roads. A major construction work is going on; but there are problems. We all know that whenever we make a big road or a bypass, before the work is completed, it becomes a narrow road because of encroachments. At the moment, we have some provisions in the Cr. RC. and the Indian Penal Code, by which we can prevent encroachments; so, in direct manner, we can prevent encroachments and clear them. Therefore, this legislation, which is coming up, is to ensure that we have a proper system under the authority of the Central Government to see that encroachments are prevented. So, if there are encroachments, then, there would be a method of removing them, and should anybody have any complaint, there is a tribunal to which it can be referred. Therefore, I want to assure the hon. Member that we are not only talking of construction of roads, but we are also making sure that these roads are free from encroachment and that they meet the requirements for which they have been constructed.
